

The map displays the geographical distribution of 100 sampling sites across Singapore. The sites are marked with pink dots and are concentrated in the central and eastern parts of the island, particularly in the areas of Woodlands, Yishun, Sengkang, and the central urban area. The map also shows the Western Water Catchment, Central Water Catchment, and North-Eastern Islands. A scale bar at the bottom right indicates distances from 0 to 15 km.
